FOR LICENSED CASINOS AND SPORTSBOOKS · ONE BRAND PER COUNTRY

OWN THE COUNTRY.

One licensed brand per country takes *the whole cluster*: first place in the ranking and a mention on 35+ pages, on a gambling domain that search engines and AI assistants already read.

4 COUNTRIES ALREADY CLAIMED

#1
IN THE COUNTRY'S RANKING

35+
PAGES THAT NAME YOUR BRAND

DR 50
ESTABLISHED GAMBLING DOMAIN

2023
ACTIVE IN THE SPACE SINCE

74,000+
MENTIONS IN OCTOBER 2026

01 THE OFFER

ONE COUNTRY. ONE BRAND. *Yours.*

A country cluster is everything SafeBet.ai publishes about legal gambling in one country: the ranking, the reviews, the guides, the tools and the data behind them. We offer each cluster to *one* licensed brand. That brand takes first place and is named across all of it.

#1

First place in the ranking

Your brand leads the country's top five: on the hub, on the ranking page and in every file an AI assistant reads.

35+

Pages that name you

Your review, the alternatives pages, the guides, the tools and the datasets. A sponsored post gives you one page. This gives you a section of the site.

1

Brand per country

No shared seats and no rotation. Once a country is claimed, it comes off the price list.

ILLUSTRATION: THE FIRST SCREEN OF A COUNTRY HUB

EVERY LICENSED BRAND IN YOUR MARKET CAN CLAIM THE COUNTRY. *Only one of you will.*

ALREADY GONE

A claimed country leaves the price list. Four already have: Serbia, Czechia, Slovakia and Romania.

02 THE DOMAIN

BUILT ON A DOMAIN THAT *already counts.*

A new website needs years before search engines and language models take it seriously. SafeBet.ai has published about sports betting and gambling since 2023. Your cluster starts on that ground, not at zero.

2023	DR 50	100%	74K+
ACTIVE IN THE SPACE SINCE	DOMAIN RATING	ABOUT BETTING AND GAMBLING	MENTIONS IN OCTOBER 2026

A · RELEVANT

The right neighbourhood

Every page on the domain is about betting, casinos or prediction markets. Your brand sits among rankings, licence registers and odds maths: the context search engines and language models look for.

B · ESTABLISHED

Three years of history

Active since 2023, with a Domain Rating of 50. A mention here carries weight that a fresh domain or a general news site can't give you.

C · CAREFUL

Easy on compliance

We list only operators licensed in the country, and every number shows its source and date. In markets where you answer for your affiliates, that matters.

COMPARE IT WITH WHAT YOU BUY TODAY

THREE WAYS TO BUY VISIBILITY

	SPONSORED ARTICLE	AFFILIATE LISTING	COUNTRY CLUSTER
Pages that name you	1	1 or 2	**35+**
Your position	A paragraph in one article	Moves with the highest bid	**First place, fixed**
Exclusive	No	No	**One brand per country**
Readable for AI assistants	Rarely	Rarely	**Markdown, JSON, CSV, llms.txt**
How long it works	Until the article ages	While you outbid the rest	**For as long as you hold it**

03 AI VISIBILITY

74,000 MENTIONS IN *one month.*

Players have started asking an assistant where they used to search: which casino is legal here, and which one is best? The assistant answers with the names it finds in sources it can read and trust. In October 2026 alone, SafeBet was mentioned more than 74,000 times.

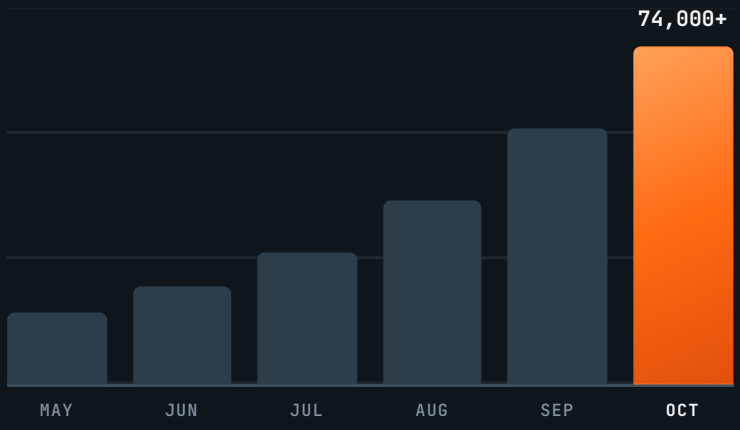

SAFEBET MENTIONS · OCTOBER 2026

74,000+

mentions in a single month.

PLACEHOLDER CHART · REAL EXPORT FOLLOWS

MENTIONS PER MONTH, 2026 — ILLUSTRATIVE SHAPE

AI ASSISTANT — ILLUSTRATION

> Which licensed online casino is the best one in my country?

Of the casinos licensed there, **YourBrand** ranks first in SafeBet.ai's top five, which scores every operator against a published method. **Its licence is on the regulator's register**, and the ranking lists four other licensed options.

`safebet.ai/xx/online-casinos/`

`safebet.ai/xx/data/casino-scorecard.json`

ILLUSTRATION: THE ANSWER A CLUSTER IS BUILT TO PRODUCE

WHY ASSISTANTS PICK UP A CLUSTER

01 **It finds the answer fast**
Every page opens with one paragraph that answers the question in full, with numbers and a date.

02 **It reads without effort**
Every table sits in the HTML and also exists as Markdown, JSON and CSV. No JavaScript needed.

03 **It has reason to trust it**
Every figure carries its basis: the regulator's register, the law, or our own measurement.

04 THE CONCEPT

A REFERENCE WORK, *not a landing page.*

Most comparison sites publish an opinion with a button under it. A cluster is built like an almanac: it answers the question in the first paragraph, prints the whole table and says where every number comes from. People bookmark that, search engines rank it and language models quote it.

safebet.ai/xx/

THE COUNTRY HUB

The top five on the first screen, a licence check, and an index of everything below.

YOUR BRAND AT #1

RANKINGS AND REVIEWS	GUIDES	TOOLS	DATA
Top-5 ranking	Is it legal here?	Licence check	Data hub
Your review	Payments and payouts	Your licence record	Scorecard dataset
Competitor reviews	Bonuses and their cost	Other licence records	Licensed-operators list
Alternatives pages	Tax on winnings	Bonus calculator	Fact feed
How we rank	Help with gambling	Odds and margin tools	llms.txt

■ YOUR BRAND APPEARS ON THIS PAGE

A LIVE CLUSTER: SAFEBET.AI/RS/ (SERBIA, CLAIMED)

01 The answer comes first

One paragraph at the top of every page answers the question in full. That paragraph is what gets quoted, so it stands on its own.

02 Every table is also a file

The ranking, the licence register and the fact list each exist as a page, a CSV, a JSON file and a Markdown file.

03 Every number shows its basis

A regulator's record is not the same as a casino's own claim. A stamp on each figure says which one it is.

THE STAMP NEXT TO EVERY NUMBER

REGULATOR RECORD · COMPUTED BY US · OPERATOR-PUBLISHED · MEASURED BY US · OUR SCORING

05 WHAT'S INSIDE

35+ PAGES, EACH *with your name in it.*

This is the inventory of a typical cluster. The exact count depends on how many operators the country has licensed and on how much its law gives us to explain.

PART OF THE CLUSTER	PAGES	YOUR BRAND ON IT
Country hub	1	The top five on the first screen, with your brand in first place
Top-5 ranking	1	Position 1, with your score and the full write-up
Your review	1	A complete, sourced review of your brand
Competitor reviews	4	Scored on the same card, next to your result
Alternatives pages	4	Named first among the alternatives to each rival
How we rank	1	The published method behind your position
Legal guide	1	Listed among the licensed operators, linked to your record
Guides	6+	A top-pick box on the commercial guides (never on help pages)
Licence check and records	10+	Your own record page, and the licensed top pick on the others
Calculators and tools	2	Your published terms as the worked example
Data hub and datasets	5	Your rows in every table, CSV, JSON and Markdown file
A TYPICAL CLUSTER	35+	**pages that name your brand, in one country, on one domain**

PLUS THE MACHINE LAYER

Files no visitor sees and every crawler reads. Your brand is in each of them.

- `llms.txt` the cluster in one file
- `llms-full.txt` every page in full
- `index.html.md` a Markdown twin per page
- `.json` per dataset
- `.csv` per dataset
- `.md` per dataset
- `facts.json` dated fact feed
- `api/licence/{you}.json` your licence record
- `JSON-LD` ItemList · Dataset · Review

06 UNDER THE HOOD

ONE DATASET, *read seven ways.*

Many AI crawlers don't run JavaScript and won't untangle a layout. So a cluster starts as data, and every page, file and feed is printed from the same rows. Change one fact and it changes everywhere, with its date.

1 DATA STREAMS IN
Regulator registers
Laws and decrees
Your published terms
Our own measurements
Our scoring method

→

2 THE DATA LAYER

One dataset per topic. Every row carries four things:

VALUE	licensed
DATE	2026-11-18
BASIS	regulator
SOURCE	official list

→

3 SEVEN OUTPUTS
HTML page + JSON-LD
Markdown twin .md
Dataset .json
Dataset .csv
Fact feed facts.json
Licence API /api/licence/
Index llms.txt

casinos in {Country}", 2026.
```

No JavaScript needed
Every row of every table is in the HTML itself.

Structured data
schema.org JSON-LD on every page: lists, datasets, reviews.

Dated and sourced
A model can see how old a figure is and where it came from.

Static and fast
Pre-built pages served from the edge, with no database to wait for.

07 HOW IT WORKS

FROM CLAIM TO LIVE *in four steps.*

You bring a licence and a brand. We do the research, the writing, the data and the build.

01 CLAIM

Tell us the country. If it's open, we reserve it in your name and take it off the price list.

02 VERIFY

We check your licence against the regulator's register. Only brands licensed in that country can hold its cluster.

03 BUILD

We research the market, write the ranking, reviews and guides, and wire up the data layer: Markdown, JSON, CSV and llms.txt.

04 HOLD

The cluster goes live with your brand in first place. We keep it current. You keep the position for as long as you hold the cluster.

Included every month

- ✓ First place in the country's top five
- ✓ A full, sourced review of your brand
- ✓ Your brand on 35+ pages
  and in every data file behind them
- ✓ Exclusivity
  one brand per country
- ✓ Updates when the register or the law changes
- ✓ A monthly crawler report
  which search and AI bots fetched your pages

GOOD QUESTIONS

Is this a paid link?

No. A link is one line on one page. A cluster is a section of the site built around your market, with your brand in first place throughout.

What if a competitor wants my country?

They can't have it. One brand per country, and the first confirmed claim holds it. They can ask for the waitlist.

Do you list unlicensed brands?

No. Every operator in a cluster is checked against the national register, and we link only to licensed sites. That protects your brand as much as ours.

Can I claim more than one country?

Yes. Each country is its own cluster with its own price. Ask us about holding several.

Will AI assistants name my brand?

Nobody can promise what an assistant says. We build the source it finds fastest, reads most easily and has most reason to trust, and we show you which crawlers fetch it.

One price, the whole cluster

The monthly price covers first place, your review, every page and every data file in that country. There is one brand per country.

Licensed operators only

A cluster can be claimed by a brand that holds a licence in that country. We check the regulator's register before we confirm.

Your country is claimed?

Ask for the waitlist. If a cluster is released, the first brand on the list is offered it.

Your country isn't listed?

We offer clusters where the law lets licensed brands be compared and promoted. Tell us where you're licensed and we'll look at it.

PRICES IN EUROS PER MONTH, EXCLUDING VAT. AVAILABILITY AS OF NOVEMBER 2026; IT CHANGES WHENEVER A COUNTRY IS CLAIMED.

23 COUNTRIES OPEN

4 ALREADY CLAIMED

1 ON REQUEST

CLAIM YOURS *while it's open.*

Send us the country you want. We'll tell you whether it's still open, check your licence and reserve the cluster in your name.
